Preventing Slips, Trips and Falls

Slip, trip, and fall hazards are on every farm. Everyone can slip, trip or fall. However, senior farmers are at greater risk for injury due to these fall hazards. These injuries often result in hospitalization, or even worse, death.

So what can we do to protect everyone, including senior farmers, from slips, trips, and falls? Take your time doing farming chores, wear proper footwear, watch for hazards, keep pathways clear, use handrails, and stay alert.

Slips, trips, and falls can cause serious pain and suffering. Take slip, trip, and fall hazards seriously, and don't let them trip you up.

This Canadian Agricultural Safety Week, we are celebrating the AgSafe Family. For more information on keeping your family safe, visit agsafetyweek.ca.
